

MV50H & MV25H Type H Vacuum Cleaners

The Morclean MV50H, MV25H Type H Vacuum Cleaners have been purposely designed and built to meet the needs of users to safely and effectively pick up hazardous dusts and debris.

Features:

- Twin fan motor
- One or two motors
- Thermal switch protection against overheating
- Four Castor chassis or tubular caddy for rough surfaces
- Hose entry accepts 32, 38 & 51mm hose and tool kits
- Smaller models supplied with 32mm hose and tool kit
- Antistatic hose entry and 38mm conductive tool kit to dissipate build up of nuisance static.

Examples of hazardous dusts include asbestos, finely divided silica, carcinogens and highly active pharmaceutical products.

Each model in the range is equipped with three stages of filtration on the negative pressure (suction) side of the motor.

The first stage is a seal-able disposable microfibre bag, the second stage is a high efficiency filter assembly using a filter medium that is specially designed as a pre-filter material for HEPA filters.

The third stage is an oversized HEPA (High Efficiency Particulate Air) cartridge filter housed in a sturdy replaceable module.

All our Type H vacuum cleaners are supplied with 5 disposable microfibre bags and a spare secondary high efficiency filter assembly.
