

MEVA 20H, 30H & 45H ATEX APPROVED INDUSTRIAL VACUUM CLEANERS

The Morclean range of MEVA vacuum cleaners has been purposely built as suitable to pick up potentially explosive and conductive dust and debris in a Dust zone 22. The vacuums have been designed, tested and approved specifically for the collection of hazardous materials. The Type H models are also suitable for picking up dust and debris that is hazardous to health in a Dust zone 22.

This machine is available in 20L, 30L and 45L and a dry pick up only version is also available.

FEATURES

- Supplied with full 38mm conductive toolkit
- Hose length 3 metres. Longer hoses available
- All models use stainless steel canister
- Cable length 10 metres | Fitted plug
- All models supplied with 5 x microfibre burst resistant disposable bags
- All type H models supplied with spare conductive secondary filter assembly
