

## ECOFLEX WASH PAD

The **EcoFlex Semi-Permanent Vehicle Wash Pad** is a sealed watertight wash bay bund that replaces the need for a traditional concrete wash pad and associated excavation works.

The **EcoFlex** water-tight floor has been further developed by Morclean, alongside our surface mounted wash pad, in response to market demand, and where an inflatable temporary solution is not the most effective method.

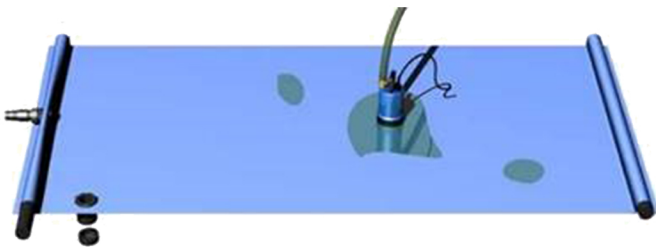

Fitted in less than an hour, the **EcoFlex** Wash Pad captures all the water within a 150mm kerbed bund which can be discharged to foul or pumped to a water reclaim system, and can easily be folded for transportation and moved if the business needs to relocate.

ecoFlex®

### FEATURES

- Transportable and fast to set up
- Can accommodate motorcycles, cars, vans, HGV's and plant equipment
- Extremely durable and chemical-resistant
- Can be manufactured to any practical dimension
- Can be used for many applications
- No civils, ground works, mess, debris or excavation
- No dilapidation works after the pad is relocated

### SPECIFICATION

Standard Colour(s):	Blue
Base Fabric (W/F) :	Trademark Polyester
Total Weight:	Approx. 1.500 g/sqm
Coating Material:	PVC
Tensile Strength:	7400/6400 N/5cm
Liquid Tightness:	>400 cms/H2O
