## AIMING FOR LAST PLACE

by Peter Morley

We're extremely proud to be sponsoring the 7th edition **Slow Race** in Italy in October. A charity event that gives the local members of the disabled community chance to have a ride in the selection of vehicles that enter the race, where the winner is the car that comes last!

The beautiful town of Guastalla, which sits north of the Emilia-Romagna region of northern Italy, comes to life once a year when this wonderful event takes place. With beautiful cars, such as Jaguars and Ferraris, all competing for last place.

The youngsters of Anffas are engaged as "navigators" and the event has been a huge success over the years. Hoards of people gather in Guastalla's main square, Piazza Mazzini, to watch or participate in the event, where the prize is awarded to the winner.

“

*A monies raised will be donated to two disabled charities*

Morclean will be donating 50% of all monies raised to Anffas, and 50% to FairPlay in the UK which support children and young people with physical, sensory, learning and behavioural disabilities. This money will allow these wonderful organisations to purchase more care equipment for the members of their community, providing them with a much better quality of life.

We've already doubled our £1K target, so please give a little [here](#), as every penny counts:

## CLEANING EXPO UK

by Michelle Reece

We always love exhibiting at industrial cleaning trade shows, but the **Cleaning Expo UK** has got us particularly excited this year, especially with it giving us the opportunity to showcase our new **SWIFT** range of bin wash machines, the Swift SY-150 and the Swift-ES (es-series).

Our focus this year will solely be on our wheelie bin wash cleaners, in our Morclean bin wash bonanza, with our best-selling Custom Plus also making an appearance at the show. However, these machines aren't only capable of washing bins, they also double up as a brilliant pressure washer tool for cleaning driveway's, patios, decking and more.

Our super-friendly and knowledgeable team will be on hand to discuss the features and benefits of our wide range of bin cleaning machines, and to impart advice on any of the other cleaning equipment that we supply. From ultra-high pressure washers and vacuums all the through to vehicle wash systems and reclaim and storage, we have a solution for every cleaning issue and need. Make sure you don't miss us on Stand 13 on Saturday 25 September at the NAEC, Stoneleigh Park, Warwickshire.

# MAKING A SWIFT ENTRY

by Peter Morley

We're delighted to announce the official launch of our NEW Swift SY-150 trailer-mounted bin wash, a whole month ahead of schedule! The Morclean team have dedicated hours of their time to research and development, with determination, dedication and innovation. The end result - a sturdy but lightweight entry-level machine packed with features and value engineered to offer best value in the market today, made in the UK at our dedicated R&D production & assembly unit.

This compact entry-level wheelie bin cleaner is economically manufactured with simple single bin lift [up to 240 litres] and packed with features to yield high financial returns in the bin washing market... See all of the detail [here](#).

## GO GREEN WITH THE NEW SWIFT-ES BIN CLEANER

by Michelle Reece

Also accomplished well ahead of schedule, the launch of our most innovative and sustainable bin wash machine to date. With all of the same incredible features as the SY-150, in addition, the battery-driven Swift ES reduces costs for fuel and servicing, and produces zero emissions too.

Built on a simple yet sturdy trailer, the Swift ES (e-series) is designed to lift and clean single 240 litre bins or smaller 120 litre bins, and wash with a powerful battery-driven jet wash. The used water is then recycled during the day to reduce weight and water tank capacity. Our bin wash machines are exceptionally simple to use. All you need to do is position the wheelie bin onto the lifting mechanism at the rear of the machine and raise the bin. The cleaning process is effortless and the bin can be pristine clean in a matter of moments.

The entirely green Swift-ES battery-run bin wash is engine and fume free, with no petrol costs, lower servicing costs, zero emissions, and only 40p per charge.

The Swift ES also boasts 4 stages of water treatment and filtration, and is manufactured in the same facility as the Custom Plus bin wash, the UK's award-winning, best-selling bin cleaning machine.

Initial machine orders are reserved and exclusive to visitors to the 1-day Cleaning Expo before being available to the general public. Make sure you order yours on the day to avoid waiting times. The machine officially goes on sale 01 October. See it [here](#).
